

SUSTAINABILITY POLICY

Architectural Metalwork Installations Limited's business operations are to be executed in a way that is economically, socially and environmentally sustainable. We are to constantly seek more sustainable practices and materials to use within our business practices in a continual process to reduce waste and work in an ever-improving manner towards the environment.

We realise that we have a responsibility to all people, including those who are not employees of this Company. That is why we work closely with our Clients and Supply chain to develop long-term, sustainable social and environmental standards.

We strive to use resources as efficiently as possible and to reduce waste. By adopting new technologies and methods wherever possible, we will work proactively to minimize our environmental footprint while improving production and business processes.

We will operate our business sustainably by following the basic practices detailed below.

- Promotion of environmental awareness among our employees and suppliers
- Caution in decision-making out of respect for nature
- Resource conservation, recycling and reduction of waste
- Products that are safe to use and harmless to the environment
- Sustainable production and production methods used throughout the supply chain
- Clean and efficient transport with limited impact on the climate

The Directors take ultimate responsibility for the environmental performance of the Company and they will ensure all staff and suppliers have a responsibility in delivering this policy.
